

**REMARKS**

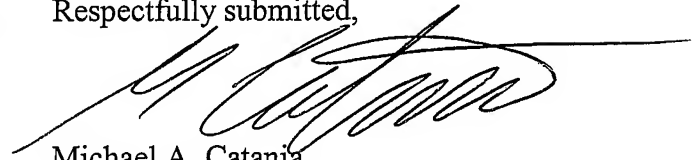

The claims were rejected under 35 U.S.C. 102 or 35 U.S.C. 103 as being unpatentable as anticipated by or obvious in view of Sun, U.S. Patent Number 4872685.

All of the claims are now limited to a removable minor body having a plurality of tabs for attaching the minor body to the major with a plurality of screws, support for which is found at paragraph [0050] and FIG. 9. Further, all of the claims are now limited to having a hollow interior, support for which is found at paragraph [0058] and FIGS. 13 and 14. To further distinguish the present invention from Sun, all of the claims are also limited to having a crown section with a thickness ranging from 0.020 inch to 0.150, support for which is found in original claim 5, which is quite different from the female unit (12) of Sun.

Therefore the Applicants respectfully solicit a Notice of Allowance.
